Note: Astragal instructions should occur after adjusting rollers on door panels
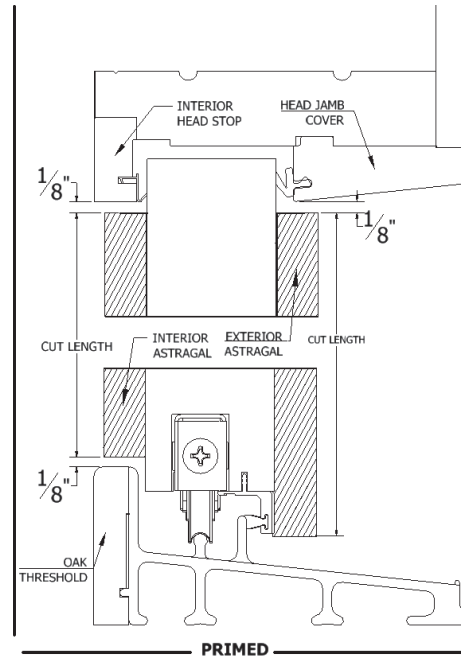

I

### INTERIOR ASTRAGAL

1. Interior Astragal is Pre-Cut to length

EXTERIOR ASTRAGAL

1. Exterior Astragal is Pre-Cut to length

II

CLAD (EXTERIOR)

1. Place the Exterior Astragal over the Astragal Bracket in the location shown in Section I.
2. Starting from the bottom, working your way to the top, place a block of wood on the face of the Exterior Astragal and tap with a hammer until it snaps in place.

PRIMED / CLAD (INTERIOR)

1. Place the wooden astragal in vertical location shown in Section I.
2. Align the astragal ¾ " from the edge of the stile (Shown on left).
3. Secure astragal by following Section 3, shown below.

III

SECURING ASTRAGAL

1. Position the astragal as stated in Sections I and II.
2. Using #8 x 1 ½ " flat head screws found in the hardware bag, install screws 10" apart along the length of the astragal ⅜" from the edge of the astragal (Shown on right).
